

ERA

High Security 3 Star Euro Profile Cylinder

Security locked within.

Security locked within.

Independently tested, the ERA 3 Star high security cylinder, is no ordinary lock. The clever central locking cam will only rotate with the use of the correct key – without it, it's completely secure from any unwanted access. The external defence zone has a designated snap line, so, even if an intruder happens to snap the cylinder, this defensive line protects the central cam from unauthorised access. Keeping the property safe, secure and with genuine peace of mind, from the experts in total security.

Achieving the highest Kitemark rating for the maximum level of protection, the ERA 3 Star cylinder is tested and approved with the Master Locksmith Association to its highest Diamond Standard, has the Police Preferred Specification, and is recommended by Neighbourhood Watch.

Anti-snap

Anti-bump

Anti-drill

Anti-pick

BS EN
1303:2015

Patented cam only rotates with the use of the correct key

Clever central cam remains locked at all times

From inside, correct key can operate the cylinder even after attack

Defensive snap secure line protects central cam when under attack

Strong nickel keys

Anti-pick and anti-bump security pins, with multiple anti-drill rods

Strength is key.

The strong steel nickel key is tough enough to withstand 100,000 durability cycles. The key head and thumbturn have been ergonomically designed for a firm grip while providing that all-important smoothness of operation.

Low torque resistance means even for users with restricted movement the lock is effortless to operate.

Outer strength, inner peace of mind.

With the security features on the external side of the cylinder, to ensure the inside is protected, the orientation of the cylinder is marked on the cylinder itself, internal (INT) and external (EXT).

Choose from Satin Chrome, Polished Chrome, Satin Brass or Dual Colour, the ERA 3 Star cylinder is suitable for use with most door handles with a Euro profile design, in a choice of single, double or thumbturn.

Secure with confidence.

For guaranteed peace of mind, each cylinder is supported with a £2000 Anti-Snap guarantee. Simply register your key once fitted and rest assured you're protected. Conditions apply.

Here to **help.**

Choose BSI-approved re-pinning at ERA, for several flexible keying options, to suit any home or business – keyed alike, master key or keyed to differ. Keys are also uniquely coded to allow for ease of re-ordering replacement or additional keys.

For trade customers, the independent UKAS test house can even test doors independently to the latest PAS 24 standards.

In experts **we trust.**

With over 180 years of designing, manufacturing and supplying market-leading locking solutions, ERA continues to drive innovation through the highest security measures, allowing you to stay one step ahead of would-be intruders.

Rigorous internal and independent testing assures you of a product and brand that works hard to bring peace of mind, with reliable solutions that have been securing homes for generations.
